only the B-29 type is concerned. The single-engine aircraft with a roaring and high-pitched noise and the elevator assembly set over the rudder assembly were reported for the first time and may be rocket-driven fighters, similar to the DFS-346. The observation of rocket-driven fighters in connection with four-engine aircraft is considered credible. Previous reports on the MOSCOW airfields repeatedly stated that four-engine bombers had small fighters or flight bodies under the fuselage. (Sic, These objects not considered to be same as above rocket fighter.)

c. The information on a rocket fighter unit being stationed at the field requires confirmation.
